

Secure software and technology

## Supporting Digital Policing

## Supporting Digital Policing

### ControlWorks®

Transforming Public Contact, Control Room and Incident Management operations in a multi-channel, modular and mobile platform with deep integration with supporting data sources and supporting systems.

### SmartWorks®

Enterprise mobile data platform for policing fully integrated with the most comprehensive range of connectors to operational police systems, deployable on any leading device – smartphone, tablet or laptop, delivering a common user experience reducing training costs and insulating clients from technology changes.

### IdentityWorks®

Integrated workflow and biometric management of police and court bail processes.

### CommsWorks™

A single, integrated platform for multichannel communications to allow our clients to take full advantage of both the voice and data capabilities that the next generation networks will provide together with social media and text-based contact.

### EvidenceWorks®

Secure, open and scalable solution for the management of Digital Evidence for UK Criminal Justice agencies including the capability to ingest, catalogue, store, analyse and share media from multiple sources.

### AdvantageDigital

Citizen self-service app and portal integrated with operational policing systems for crime reporting, appointment management and case progress monitoring.

### DSX ICCS

Integrated communications hub for all communications including digital trunk and analogue PMR radio systems, call handling systems, digital and analogue telephony, CCTV, voice recorders, intercom systems, door locks and alarms.

### PoliceWorks®

An Enterprise Operational Policing Platform designed to support all key operational policing business functions from a single application with a single POLE store for integration of data in all modules and external supporting systems.

### Mobile Technology Managed Services

ESN transition programmes, device deployment logistics, training, disposal and ongoing asset management for handheld and vehicle computing and radio devices.

### OriginDMS

A comprehensive and flexible Duty Management System, designed specifically to meet the needs of UK policing. It allows duty planners and resource managers to ensure that they have the right number of people, with the right skills, in the right place at the right time.
